

SHULEKA TECH

Shuleka User Manual

CBE Assessment & School Management

A step-by-step guide for teachers, school administrators, and office staff who are using Shuleka for the first time.

Who this book is for

If you can open a website and type, you can use this guide. Every chapter uses the same words you see on screen: **Sign in** , **Add student** , **Load students** , **Enter Marks** .

Version for schools · September 2026

Contents

1. What Shuleka is, and who can do what
2. Open the website and sign in
3. Find your way around
4. Dashboard
5. Students: add, import, load a class, open a profile
6. School staff: add a teacher
7. Subjects & learning areas
8. Class setup: grades, streams, and who teaches what
9. Exams: create, enter marks, print reports
10. If you are a teacher (not an admin)
11. My class (class teachers)
12. Your password and photo
13. Messages
14. Schools and Accounts (super admin / system admin)
15. If something goes wrong

1. What Shuleka is, and who can do what

Shuleka is the system your school uses to keep class lists, staff records, assessments, marks, and CBE report cards in one place. You do not install anything. You open it in a web browser (Chrome, Edge, or similar) on a computer, laptop, or phone.

Your school is set up for you. There is no self-signup. A school admin (or Shuleka Tech) creates your account, then you sign in.

The four kinds of account

Role	What you see	Typical jobs
Teacher	Dashboard, Exams, and My class if you are a class teacher. You do not see Students, Staff, Subjects, or Class Setup.	Enter marks for the classes you teach. Class teachers also view their learners.
School admin	The full school menu, locked to <i>your</i> school. School name appears at the top of every page.	Students, staff, subjects, class setup, exams, reports, and password resets for staff in that school.
Super admin	Extra items: Schools and Accounts . You only see schools the system admin ticked for you. Super admins cannot teach.	Work across assigned schools. Promote a teacher to school admin. Cannot make another super admin.
System admin	Every school and every user. Banner says "System Administrator" / Full Access.	Add schools, delete a school or a subject, make or remove super admins, and tick which schools each super may open.

Tip. If a button is missing, you are probably on a teacher account. Ask your school admin to do that job, or to make you an admin if that is your role.

2. Open the website and sign in

1. Open your browser and go to the Shuleka address your school gave you (the public site looks like the page below).
2. Click **Sign in** at the top right, or the Sign in button in the middle of the page.

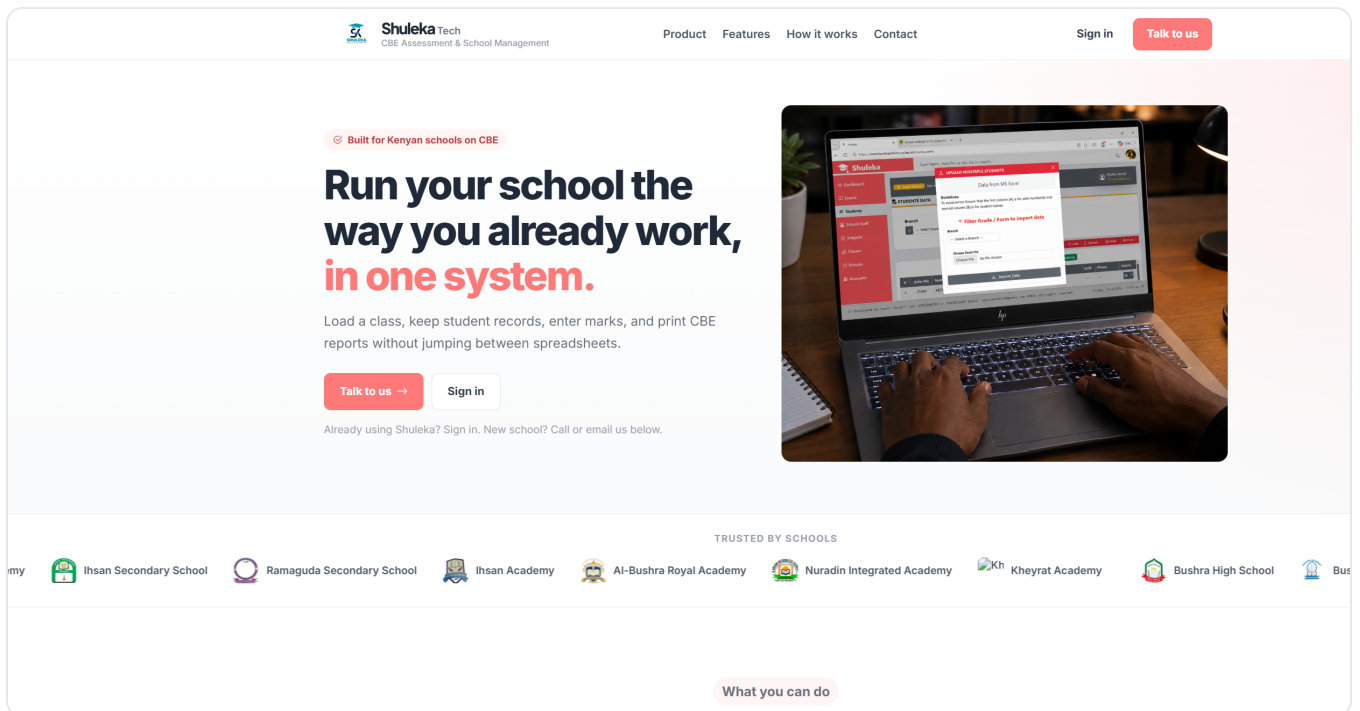

Figure 1. The Shuleka website. Use Sign in if you already have an account. New schools click Talk to us.

1. On **Welcome to Shuleka**, type your **Username** and **Password**.
2. Optional: tick **Remember me** on a computer only you use.
3. Click the red **Sign in** button.

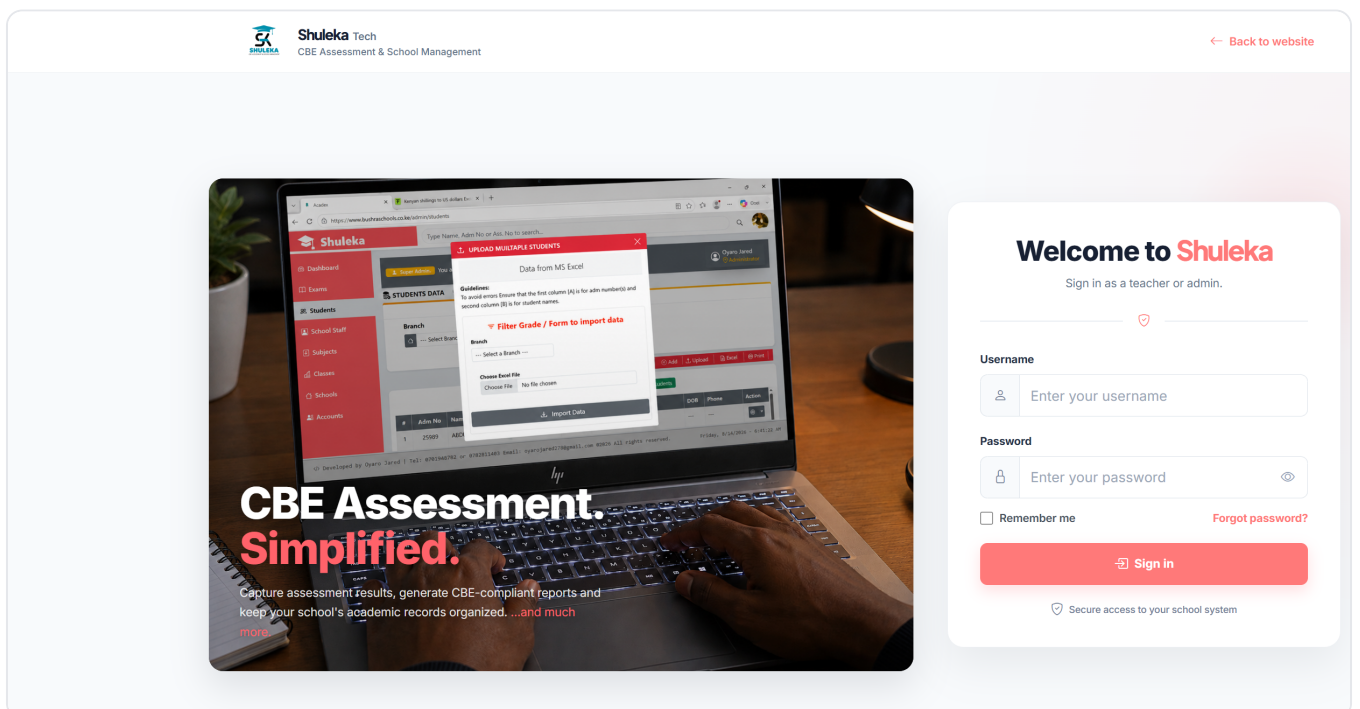

Figure 2. Sign-in page. Username and password are given by your school. Click the eye icon to check you typed the password correctly.

Your first username and password

- When a school admin adds you under **School Staff**, Shuleka creates a username from your name and the last four digits of your phone.
- Your **first password** is usually those same **last four digits of your phone number** (for example, if your phone is 0712 345 678, try **5678**).
- Change that password the first time you sign in (see chapter 12).

Forgot password? Click **Forgot password?** on the sign-in page. Shuleka will tell you to ask your school admin to reset it, or to call Shuleka Tech. There is no email reset link.

Wrong password. The page says “Invalid username or password”. Check caps lock, try the last four phone digits, then ask admin to use **Reset password** on Accounts or on your staff profile.

3. Find your way around

After you sign in you always see the same frame: coral sidebar on the left, search at the top (admins), your school name in a dark bar, then the page in the middle.

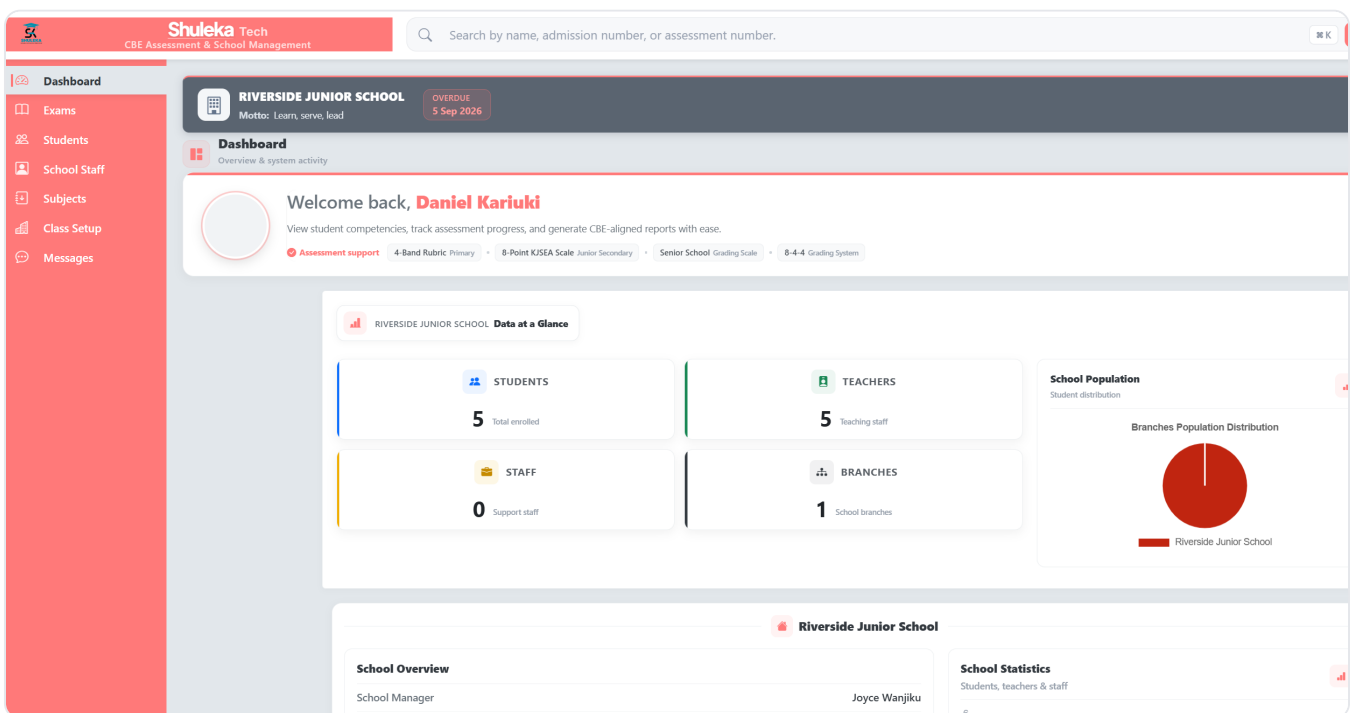

Figure 3. After sign-in as a school admin. Use the left menu to move around. The dark bar shows your school name.

The left menu (school admin)

Menu	Use it to
Dashboard	See counts of students and staff, and a welcome screen.
Exams	Create assessments, enter marks, print reports, set grading.
My class	Only if you are a class teacher (and not a super admin).
Students	Class lists, add or import learners, open a profile.
School Staff	Teachers and support staff.
Subjects	Learning areas offered in the school.
Class Setup	Grades, streams, who teaches each subject, class teachers.
Messages	Parent/teacher messaging (coming soon).
Schools / Accounts	Only super admin and system admin.

On a phone the same items sit in a compact bar. Look for the same names.

Search for a student (admins)

1. Click the long search box at the top: *Search by name, admission number, or assessment number.*
2. Type part of the name, the admission number, or the KNEC assessment number, then press Enter or click the arrow.
3. A **Student Search** window lists matches. Open the student you want.
4. Press **Esc** or **Close** to dismiss the window.

Shortcut. On a computer you can jump to search with Ctrl+K (Windows) or ⌘K (Mac).

Your account menu

Click your name or photo at the top right. You can **Update Photo**, **Change password**, or **Sign Out**. Use **Logout** at the bottom of the sidebar for the same sign-out.

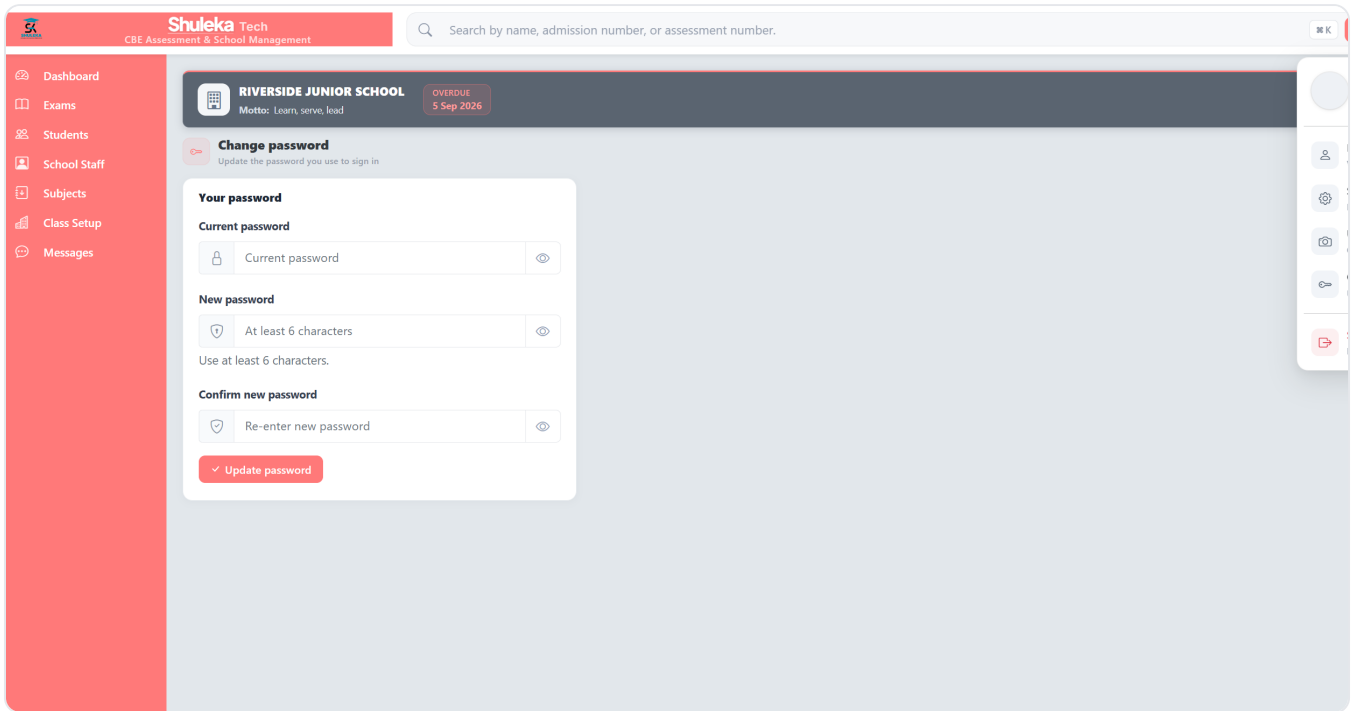

Figure 4. Account menu (right) and Change password. Sign out when you finish, especially on a shared computer.

4. Dashboard

School admins land on **Dashboard** — “Overview & system activity”. Teachers land on **Teacher Portal** instead (chapter 10).

- The welcome line uses your full name.
- Cards show how many **Students**, **Teachers**, **Staff**, and (for some accounts) branches.
- Your school motto appears under the school name.
- A coloured badge next to the school name may show subscription status (Active, Due soon, or Overdue). You can still work; the office uses it for billing.

5. Students

Click **Students** in the sidebar. The first time, the list is empty until you load a class.

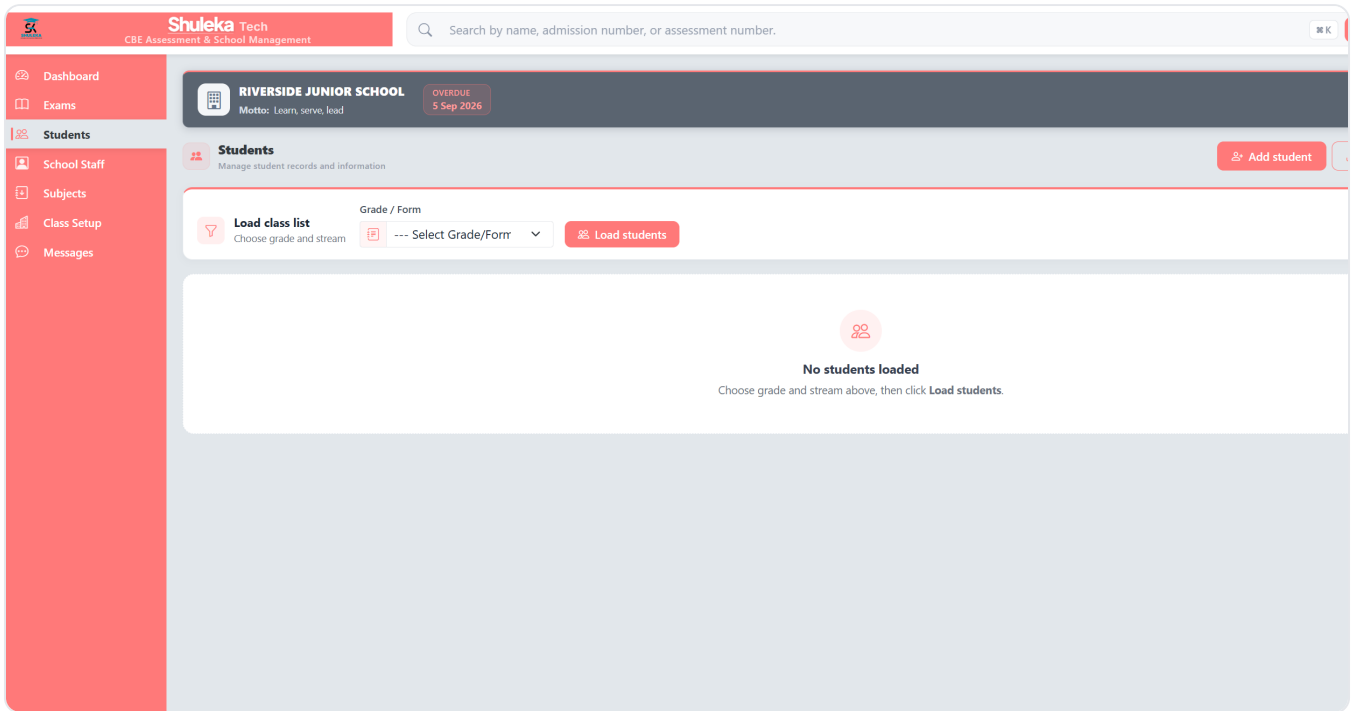

Figure 5. Students. Choose Grade / Form, then Load students. Add student, Import list, and Export list sit on the right.

Load a class list

1. Under **Load class list**, open **Grade / Form** and pick the class (for example GRADE 7).
2. If that class has streams, a **Stream** box appears. Pick A, B, and so on.
3. School admins do not pick a school — you already belong to one. Super/system admins also choose **School** first.
4. Click **Load students**.

The table shows admission number, name, gender, assessment number, date of birth, and parent phone. Use **Search this class** to filter the table without leaving the page.

Add one student

1. Click **Add student**.
2. Choose **Grade / Form** (and stream if asked).
3. **Admission No.** is usually filled with the next free number. Change it only if your school uses a different sequence.
4. Fill **Full Name** and **Gender**. Add date of birth, parent name, and parent phone when you have them.
5. Optional fields (NEMIS, KNEC, KCPE, boarding, pathway) can wait.
6. Click **Add student** at the bottom of the window, or **Cancel** to close without saving.

The screenshot displays the 'Add student' form within the Shuleka Tech interface. The form is a modal window with a red header and a close button. It contains two columns of fields. The left column includes: 'Grade / Form' (dropdown), 'Full Name' (text), 'Date of Birth' (calendar), 'Boarding' (dropdown), 'NEMIS No.' (text), 'KCPE Marks' (text), 'KCPE Year' (text), and 'Parent Name' (text). The right column includes: 'Admission No.' (text with a '#' icon), 'Gender' (dropdown), 'Birth Cert No.' (text), 'KNEC No.' (text), 'Pathway' (dropdown), 'KCPE Index' (text), 'Admission Date' (calendar), and 'Parent Phone' (text). At the bottom are 'Cancel' and 'Add student' buttons. The background shows the 'RIVERSIDE JUNIOR SCHOOL' dashboard with a sidebar menu and a search bar.

Figure 6. Add student. Required items are grade, admission number, name, and gender. Parent phone is used later for messaging.

Import many students from Excel

1. Click **Import list**.
2. Read the two panels. Column A header must be **Adm No**, column B **Fullname**.
3. Click **Download sample spreadsheet** if you want a ready file.
4. Start admission numbers at the **Next admission number** shown (duplicates are skipped).
5. Choose **Grade / Form**, click **Choose File**, pick an .xls or .xlsx file, then **Upload students**.

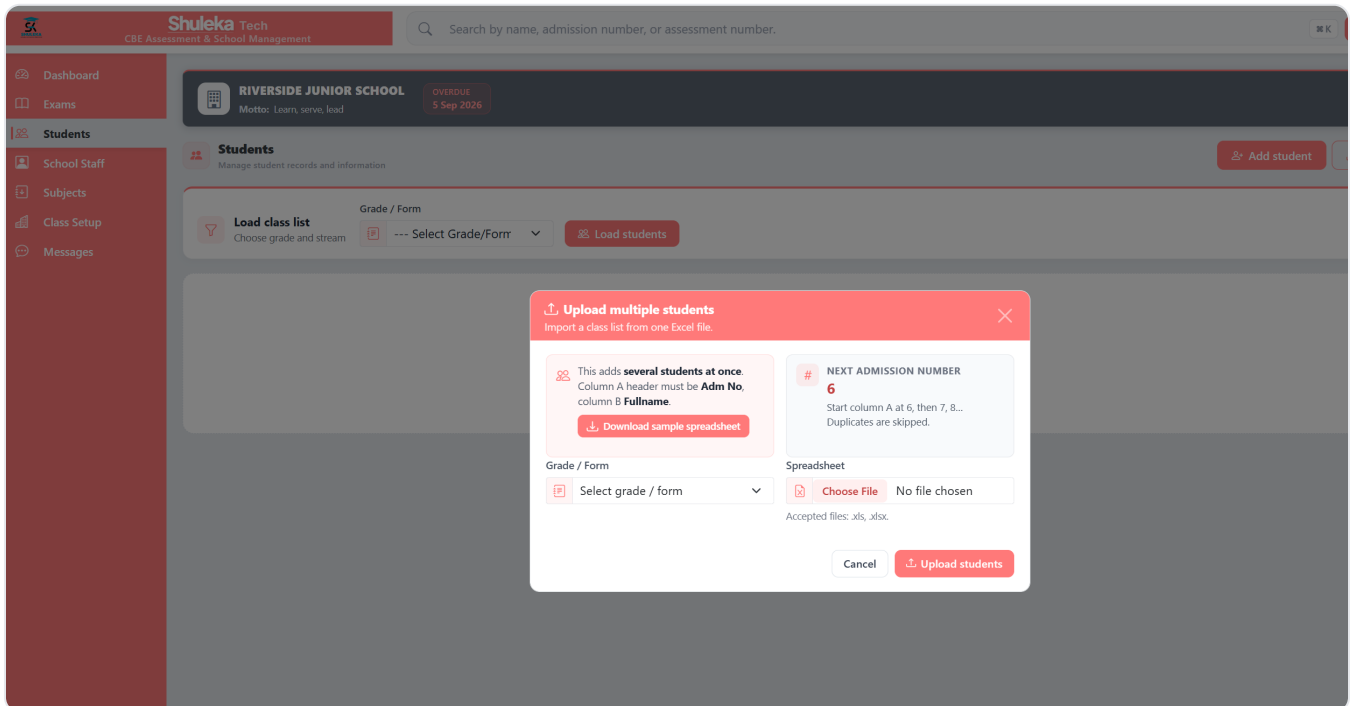

Figure 7. Import list. Use the sample spreadsheet so column headings match exactly.

Export the class you loaded

After a class is on screen, click **Export list** to download that class as Excel.

Move several students to another class

1. Tick the boxes next to the learners (or Select all).
2. Click **Move selected** (wording: the bar says how many are selected, then open Move).
3. Choose the destination class. Admission numbers do not change. This cannot be undone from that screen.

Open a student profile

In the class table, open the row menu (three dots) and choose **Profile**, or use top search. You can also click through from search results.

The screenshot displays the Shuleka Tech CBE Assessment & School Management interface. The top navigation bar includes a search bar and a sidebar with options like Dashboard, Exams, Students, School Staff, Subjects, Class Setup, and Messages. The main content area shows the profile for Amina Hassan, a student at Riverside Junior School, Grade 7, A. The profile includes a passport photo, a 'Day' boarding status, and a list of learning areas: English, Kiswahili, Mathematics, Integrated Science, and Social Studies. Below this, there are tabs for 'Student Info' and 'Academics'. The 'Student Info' tab is active, showing basic details such as admission number (1), full name (Amina Hassan), gender (Female), date of birth (03/01/2013), boarding status (Day), and date of admission (09/08/2026). It also shows school placement details: branch (Riverside Junior School), grade/form (Grade 7), and stream (A). At the bottom, there are sections for academic records, including pathways, KCPE marks, and KCPE index.

Figure 8. Student profile. Use Edit, Move, or Delete. Student Info holds personal data. Academics holds exam history and report cards.

- **Update passport** — photo.
- **Edit** then **Save Changes** — name, contacts, KCPE, and similar.
- **Move** — send this one learner to another grade or stream.
- **Delete** — permanent. Confirm only if you are sure.
- **Academics** tab — exam results and options to print a report card (with or without class position; CBE often prints without positions).

6. School staff

Click **School Staff**. The **Teachers** tab lists teaching staff. **ADMIN** on a name means that person can open the admin menus. **Support staff** is a separate tab.

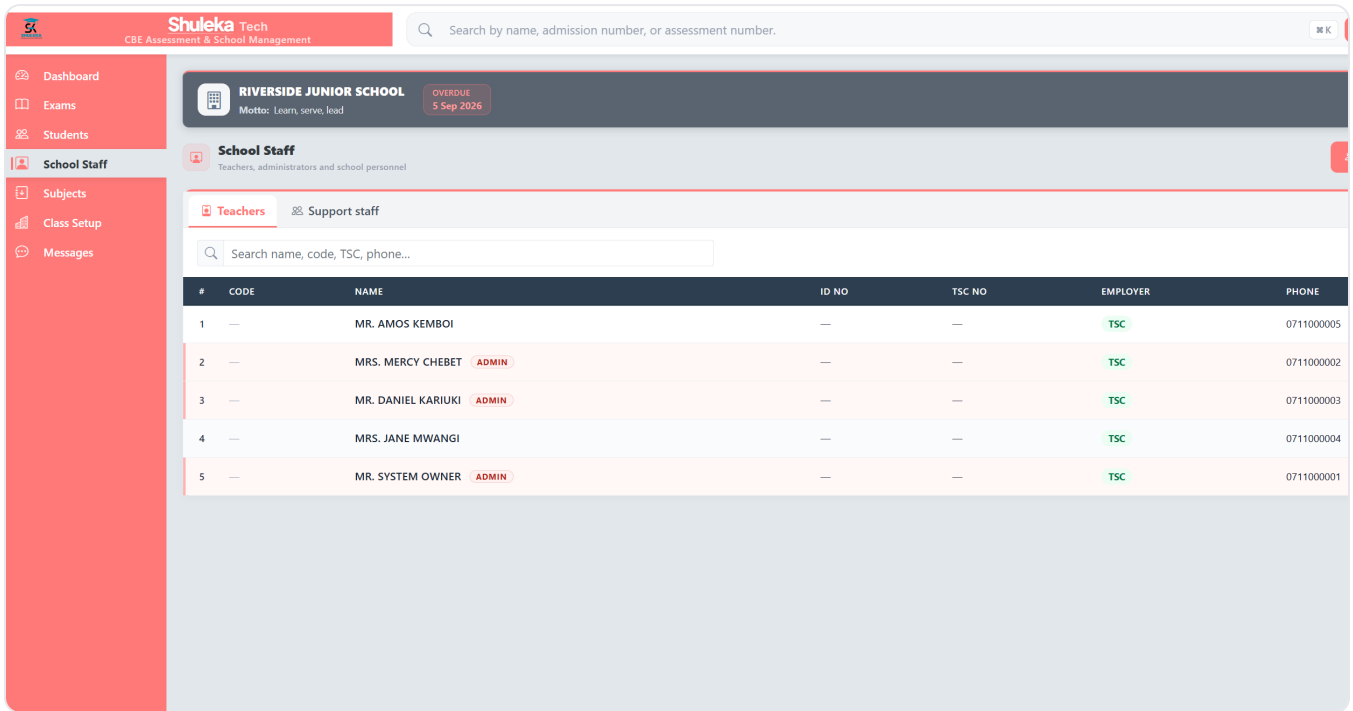

Figure 9. School Staff · Teachers. Search by name, code, TSC, or phone. Use the row menu for Profile, Edit, or Delete.

1. Click **Add teacher**.
2. Choose employer prefix if you use a teacher code (TSC/BOM), then optional code such as T12.
3. Set **Gender**, title (Mr., Mrs., ...), and **Fullname**.
4. **Phone number** is required (0712345678 or +254712345678). This drives the first password.
5. Optional: National ID, TSC number, email.
6. Click **Save teacher**.

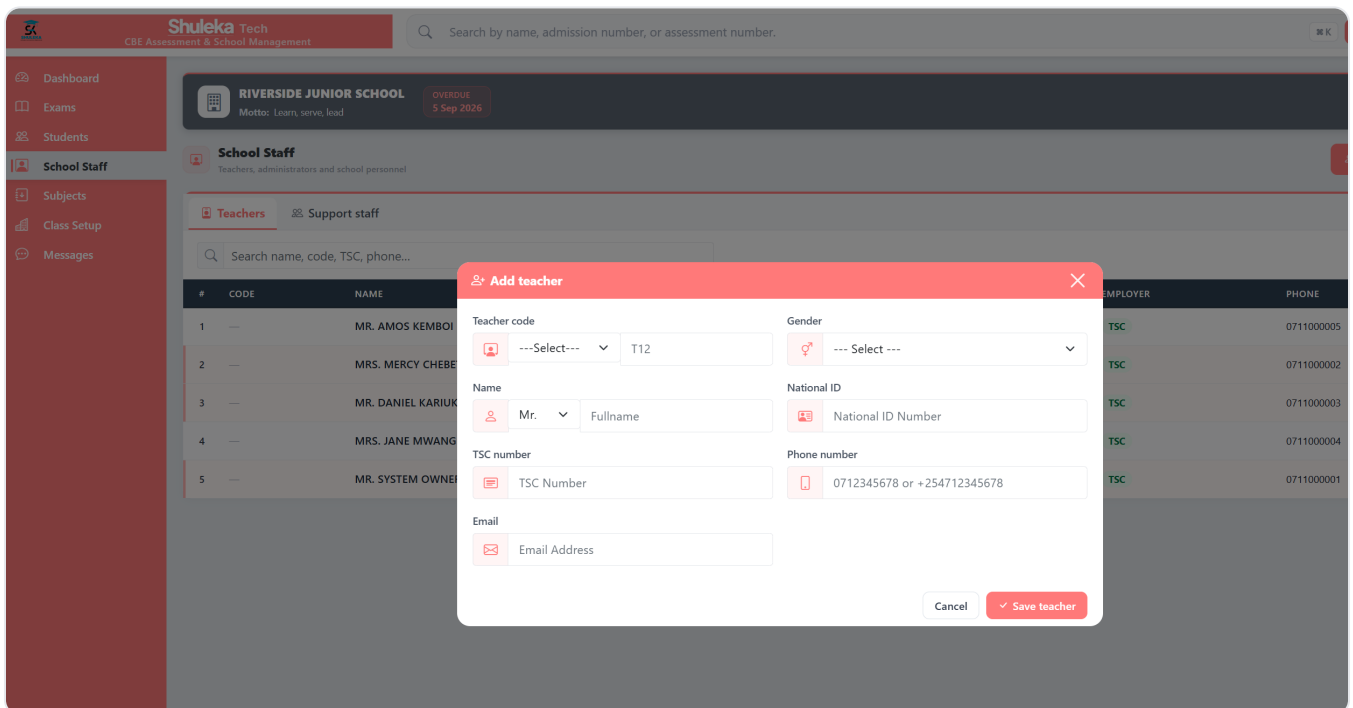

Figure 10. Add teacher. After save, tell the teacher their username and that the first password is the last four digits of this phone number.

Use **Export list** to download staff as Excel. Open **Profile** on a row to see details, reset a password (if you are allowed), or upload a photo.

Do not click Make super on a real class teacher unless you mean it. Promoting to super admin removes their teaching load and class-teacher assignments.

7. Subjects & learning areas

Click **Subjects**. You see codes, names, categories, which classes take the subject, and whether it is compulsory.

CODE	NAME	CATEGORY	CLASSES	COMPULSORY	EXAM
SST	SOCIAL STUDIES	Humanities	Grade 7, Grade 8	Yes	
ISC	INTEGRATED SCIENCE	Sciences	Grade 7, Grade 8	Yes	
MAT	MATHEMATICS	Sciences	Grade 7, Grade 8	Yes	
KIS	KISWAHILI	Languages	Grade 7, Grade 8	Yes	
ENG	ENGLISH	Languages	Grade 7, Grade 8	Yes	

Figure 11. Subjects & Learning Areas. Filter by All, Humanities, Languages, or Sciences.

1. Click **Add subject**.
2. Enter name (for example English), code (for example 121), and category.
3. Tick Examinable / Compulsory as your school requires.
4. Tick the grades that offer this learning area, or All classes.
5. Save. Use the pencil to edit later.

View by grade shows which learning areas sit on each grade. **Deleting a subject** is allowed only for a system admin.

8. Class setup

Click **Class Setup**. This is where the school structure lives. Do this before a busy exam week: grades first, then subjects on students, then teachers.

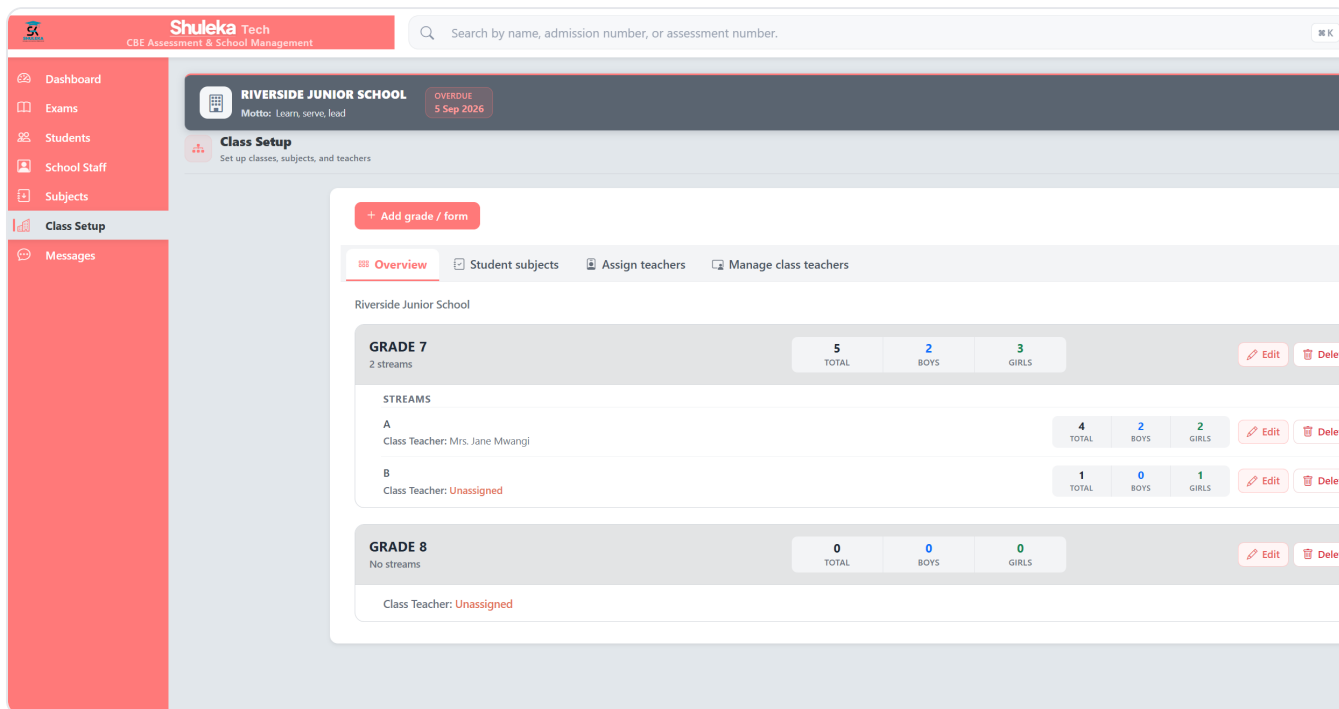

Figure 12. Class Setup · Overview. Unassigned in orange means that stream still needs a class teacher.

Overview — add a grade or form

1. Click **Add grade / form**.
2. Set class year (for example 2026), grade/form name (Grade 7 or Form 2), and optional streams separated by commas (A, B).
3. Save. Use **Edit** to rename; **Delete** only if the class is empty or you accept the warning.

Student subjects

Open the **Student subjects** tab. Choose a class (and subject). Tick the learners who take that subject. Compulsory subjects are usually already ticked. Save when the ticks are right. Senior school (for example Grade 10) may need this more often because of pathways.

Assign teachers

Open **Assign teachers**. Choose the grade. For each subject and stream, pick a teacher from the list. Super admins do not appear as teachers. Click save when the page confirms “Teachers for this class have been updated.”

Manage class teachers

Open **Manage class teachers**. Choose the grade, then pick one teacher per stream. That person gets **My class** in their sidebar. A stream marked Unassigned on Overview still needs this step.

9. Exams: create, enter marks, print reports

Click **Exams**. Admins see five tabs. Teachers see a shorter page: pick an open exam and enter marks.

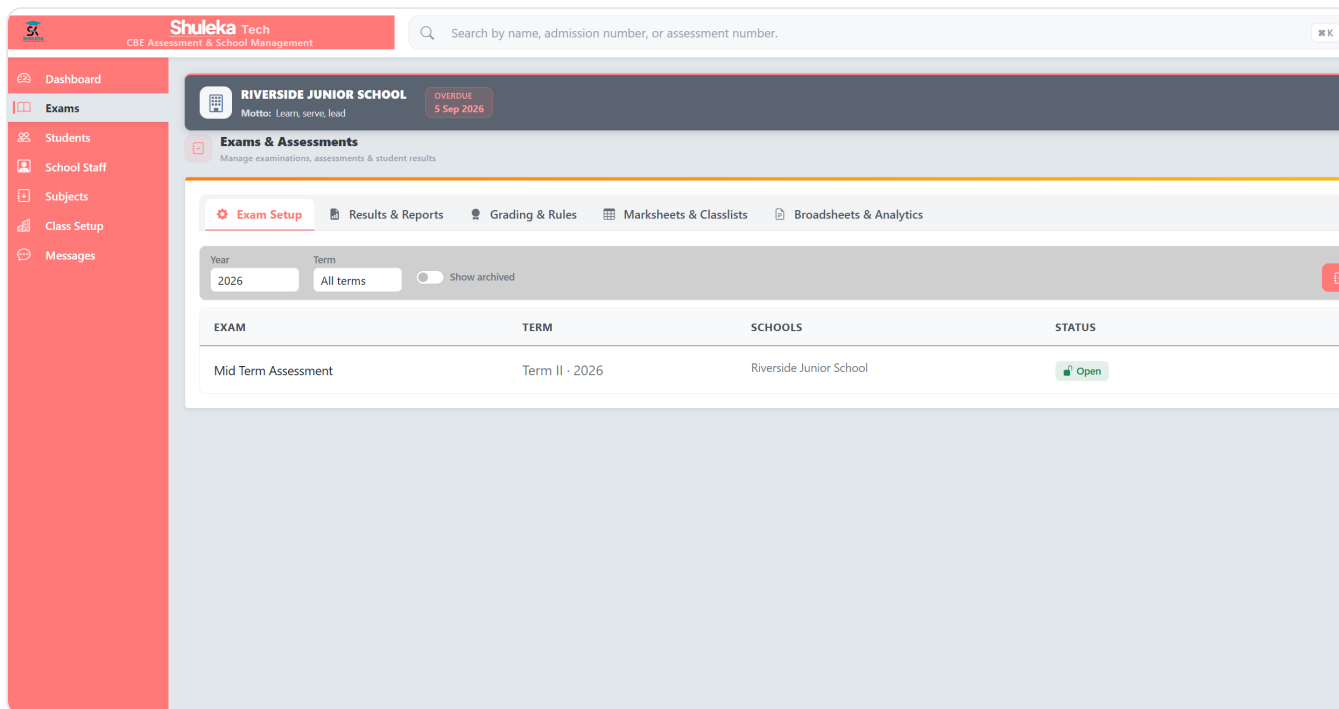

Figure 13. Exams & Assessments - Exam Setup. Status Open means teachers can still type marks. Use Year and Term to filter the table.

Create an exam (admin)

1. On **Exam Setup**, click **Create New Exam/Assessment** (or the + button on the right).
2. Choose school (if you can see more than one), academic year, term (I, II, or III), and exam name (for example Mid Term Assessment).
3. Optional: set **Teachers' marks entry deadline** so a banner reminds teachers.
4. Save. The exam appears with status **Open**.

On the exam row:

- **Enter Marks** — open the mark sheet.
- ⋮ menu — **Edit**, **Set teachers' marks entry deadline**, **Lock Exam**, or **Delete Exam**.

Lock Exam stops all further mark entry. Unlock later with **Unlock Exam** if you must correct a paper. **Delete Exam** wipes every mark for that exam. There is no undo.

Tick **Show archived** if you need old exams that were put away.

Enter marks

1. Click **Enter Marks** on the exam, or open Exams as a teacher and pick the exam.
2. Stay on **By subject** (class markbook) or switch to **By learner** (one student, all papers).
3. Choose **Class**, then **Stream** if asked, then **Subject**.
4. Type scores in **MARKS / 100** (or whatever "out of" is set). Marks save as you work when the page allows saving.
5. Use **Back to Exams** when finished.

Shuleka Tech
CBE Assessment & School Management

Search by name, admission number, or assessment number.

RIVERSIDE JUNIOR SCHOOL
Motto: Learn, serve, lead
OVERDUE 5 Sep 2026

← Back to Exams

Mid Term Assessment

By subject By learner

Class: GRADE 7 Stream: A Subject: ENG — English

Search by adm no or name...

ENG — English

#	ADM NO	NAME	MARKS / 100
1	1	AMINA HASSAN	78
2	2	BRIAN ODHIAMBO	64
3	3	CYNTHIA NJERI	88
4	4	DAVID KIPRONO	45

Figure 14. Marks entry for Mid Term Assessment, Grade 7 A, English. Type in the marks column. Search by admission number or name to jump down the list.

If the exam is locked, or the deadline has passed, teachers see a closed message. Admins may still view marks but teachers cannot save.

Subjects in the list are those assigned in Class Setup → Assign teachers. If English is missing, the teacher was not assigned that lesson.

Results & reports

The screenshot displays the Shuleka Tech interface for 'RIVERSIDE JUNIOR SCHOOL'. The sidebar on the left contains navigation links: Dashboard, Exams, Students, School Staff, Subjects, Class Setup, and Messages. The main header area shows the school's name, motto 'Learn, serve, lead', and an 'OVERDUE' status for '5 Sep 2026'. Below this, the 'Exams & Assessments' section is active, with tabs for 'Exam Setup', 'Results & Reports', 'Grading & Rules', 'Marksheets & Classlists', and 'Broadsheets & Analytics'. The 'Results & Reports' tab is selected, showing a 'Filter Results' section with three dropdown menus: 'Grade / Class' (with 'Select Grade' selected), 'Stream' (with 'All' selected), and 'Exam' (with '--Select Exam--' selected). A 'Fetch Results' button is located at the bottom of the filter section.

Figure 15. Results & Reports. Choose grade, stream, and exam, then Fetch Results.

1. Open the **Results & Reports** tab.
2. Select Grade / Class, Stream (or All), and Exam.
3. Click **Fetch Results**.
4. From there you can open class ranking and generate report cards. When asked about positions, CBE schools often choose **No — Print without positions (CBE Recommended)**.
5. Optional: tick **Include opening date** and set the date so reports print "School opens on ...".

Grading & rules

Open **Grading & Rules**. Assign the right scheme to each grade: 4-band rubric (primary), 8-point KJSEA scale (junior secondary), senior school scale, or 8-4-4. Without a scheme, reports may show scores without performance levels (EE1, ME1, and so on).

Marksheets & classlists / Broadsheets

Use **Marksheets & Classlists** to print blank or filled mark sheets. Use **Broadsheets & Analytics** for whole-class analysis and Excel/PDF downloads after marks are in.

10. If you are a teacher (not an admin)

Sign in the same way. Shuleka sends you to **Teacher Portal**, not the admin dashboard.

- The sidebar is short: **Dashboard**, **Exams**, and **My class** if you are a class teacher.
- The welcome card lists how many classes you teach. Click **Enter Marks**.
- **Classes & Subjects** shows your teaching load (class, stream, subject, headcount).

- You cannot add students or create exams. Ask your school admin.

On Exams you only see exams that are still **Open**. If the list is empty, either no exam exists yet, or the last one was locked.

11. My class (class teachers)

You see **My class** only after an admin assigns you under Class Setup → Manage class teachers. Super admins never get this menu.

1. Click **My class**.
2. If you have more than one stream, pick the chip for that class.
3. **Learners** — register: names, contacts, missing parent phones.
4. Open a learner for a simple profile and **Back to my class**.
5. **Exam results** — pick an exam to see marks for your class.
6. Other tabs cover class performance for that exam.

If you see “You are not assigned as a class teacher”, ask admin to set you on Class Setup → Manage class teachers.

12. Your password and photo

1. Open the account menu (your name, top right) → **Change password**.
2. Type current password, new password (at least 6 characters), and confirm.
3. Click **Update password**.

The screenshot shows the Shuleka Tech web application interface. At the top, there's a header with the Shuleka Tech logo and a search bar. Below the header, a sidebar on the left contains navigation links: Dashboard, Exams, Students, School Staff, Subjects, Class Setup, and Messages. The main content area displays the 'Change password' form for 'RIVERSIDE JUNIOR SCHOOL'. The form includes three input fields: 'Current password', 'New password' (with a strength indicator 'At least 6 characters'), and 'Confirm new password' (with a prompt 'Re-enter new password'). Each field has an eye icon to toggle visibility. A red 'Update password' button is at the bottom of the form. A red banner at the top of the form area says 'OVERDUE 5 Sep 2026'.

Figure 16. Change password. Use the eye icons to check spelling. Do not share the new password.

Update Photo in the same menu uploads a passport picture. Admins can also reset another person's password from Accounts or the teacher profile, within their school. Nobody can reset their own password that way (use this page instead). School admins cannot reset a super admin or system admin.

13. Messages

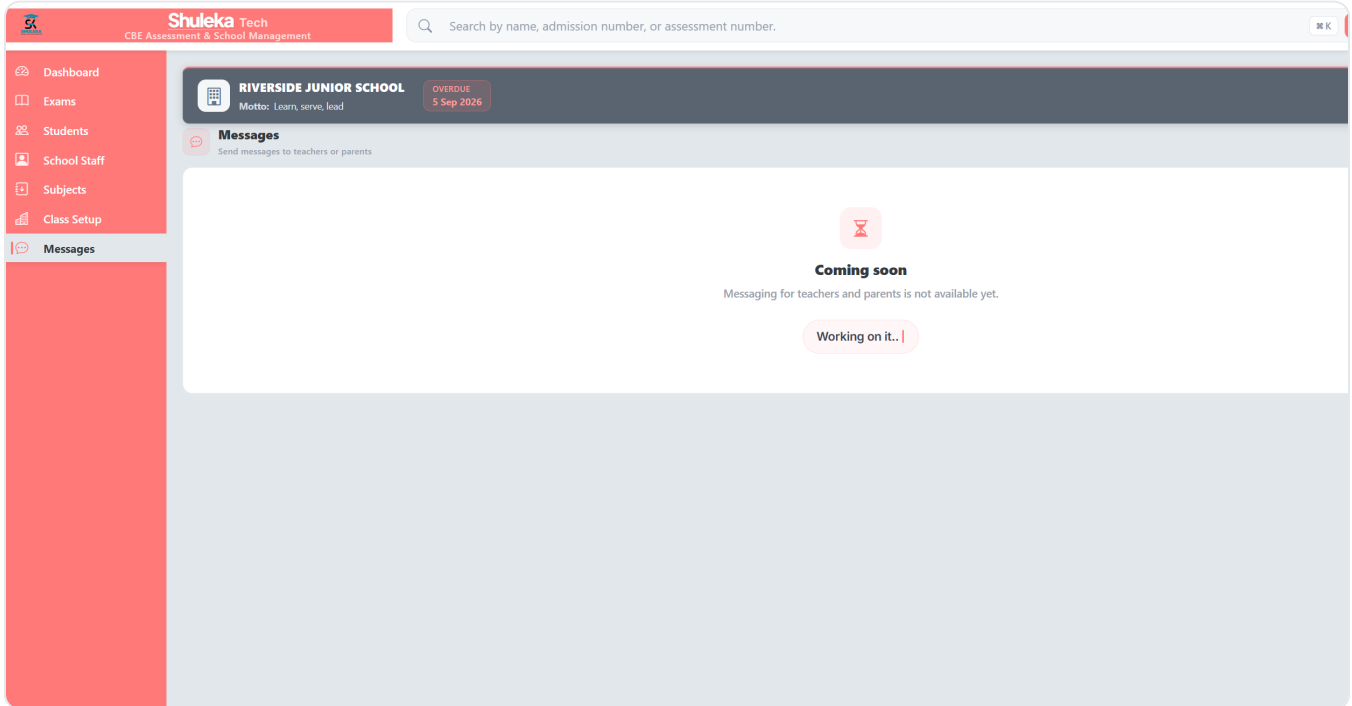

Figure 17. Messages. Parent and teacher SMS is not available yet. Use phone calls or your usual school channel until this page opens.

14. Schools and Accounts (super admin / system admin)

These two sidebar items appear only if you are a super admin or system admin.

Schools

1. Click **Schools**.
2. Choose a school in **Select branch / school to view details**.
3. Use **Add** to register a new school, **Edit** to change name, motto, logo, manager, and similar, and **Delete** only if you are a **system admin** and you understand that school data will go.

Accounts

Click **Accounts**. Filter by All, Admin, Super admin, Teacher (and System admin if you are one). Search by name, username, phone, or school.

Button	Who can use it	What it does
Make admin / Remove admin	Super admin, system admin	Lets a teacher use Students, Staff, Exams setup, and the rest of the school menu — still in their school.
Make super / Remove super	System admin only	Creates a super admin with no schools ticked until you save schools. Teaching assignments are cleared.
Save schools	System admin	Ticks which schools that super may open. If none are ticked, that super sees nothing.
Reset password	Admins, within their reach	Sets the password back to the last four digits of the phone. Cannot be used on yourself or on a system admin (unless you are system admin).

A super admin with no schools ticked is not a bug. The system admin must open Accounts, tick schools, and click [Save schools](#).

15. If something goes wrong

What you see	What to try
Invalid username or password	Last four digits of phone; ask admin to Reset password; confirm username spelling.
Sent to Teacher Portal but you expected admin menus	Your account is not a school admin. Ask to be made admin on Accounts.
No students loaded	Pick grade (and stream) then Load students.
No exam open for marks entry	Admin must create an exam, or Unlock a locked one.
Subject missing on marks entry	Class Setup → Assign teachers for that class and stream.
My class missing	You are not a class teacher, or you are a super admin (super admins cannot teach).
Super admin sees an empty system	System admin has not ticked schools on Accounts.
Delete subject / delete school missing	Only a system admin can do that.
Page looks tiny on a phone	Turn the phone sideways, or use a computer for Excel import and broadsheets.

A simple weekly rhythm

1. Keep Class Setup and student lists accurate (moves, new admissions).

2. Create the term's exam and tell teachers the deadline.
3. Teachers enter marks. Admin checks missing marks, then Lock Exam.
4. Fetch Results, print report cards, share with class teachers.
5. Sign out.
